

CALIFORNIA COMMUNITY COLLEGES CLEARINGHOUSE

California Community Colleges Clearinghouse
an Online Document Resource Center

TARGET AUDIENCE:

- Faculty
- Staff
- Administrators
- Institutional Researchers
- Student Advisers
- Students

HISTORY:

The CCC Clearinghouse was initially developed in 1998 to serve as a statewide, Web-based repository for shared documents, files, and databases of mutual interest to all California Community Colleges, with an initial focus on curriculum and instructional materials. In 2008, it began a project to act as a repository for automated curriculum reporting from all 110 colleges.

CCC CLEARINGHOUSE SERVICES/PRODUCTS:

- CCC Clearinghouse
- Web Survey Wizard
- CurricUNET Workflow/Searches

CCC CLEARINGHOUSE DESCRIPTION:

The CCC Clearinghouse is a statewide, Web-based repository that allows authorized users at both the local college and state level to electronically deposit, self-index, search, and retrieve documents, files, and certain databases that are of interest to any or all of the 110 colleges and the CCC Chancellor's Office. In the future, it will provide the ability to search course outlines and program/degree reports across all 110 colleges, via the Web.

Examples include: Grant narratives/reports, program reports submitted to the CCC Chancellor's Office, new programs, course outlines, standard forms, policies, and procedures, model programs, surveys, course content objects, and others.

CCC CLEARINGHOUSE BENEFITS:

The CCC Clearinghouse reduces the time and cost needed to distribute important materials, and guarantees that all parties have the same access to the materials in their most current, updated version. It will also facilitate future innovation in curriculum design by providing access to all course outlines and program/degree reports.

WEB SURVEY WIZARD DESCRIPTION:

A tool found in the CCC Clearinghouse that allows authorized users to compose surveys online, deposit them in a publicly available section of the Clearinghouse, electronically distribute the surveys to intended audiences, allow real-time responses, and compile survey results automatically for the survey author.

WEB SURVEY WIZARD BENEFITS:

The Web Survey Wizard greatly reduces the time and cost needed to develop, distribute, and analyze surveys, particularly those intended for very wide audiences.
